Annual Income Plan

Based on your inputs and chosen assumptions, your estimated balance at retirement is $1,553,441 (current balance: $834,299) and projected future Spending Capacity is $136,759 per year ($109,360 after taxes). These amounts may change over time. The plan reported on here includes a plan for income adjustments. The Adjustment Plan below shows estimates of when this plan would call for a change in income once retirement has begun.

Values shown in today's dollars. Income values are annual and gross of tax and savings, but net of variable expenses.

Projected Balance 2033 Totals

$1,553,441

Spending Capacity 2033 Totals

$136,759

$109,360 after taxes

Income Adjustment Plan

Plan for Income Increase

If balance reaches **$1,865,953** then increase income to **$169,001**

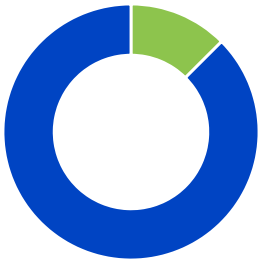
If your portfolio balance at retirement were at or above $1,865,953 (20.1% more than your projected balance at retirement), your plan would call for a $32,242 increase in retirement income to $169,001.

Plan for Income Decrease

If balance drops to **$1,009,533** then decrease income to **$129,921**

If your portfolio balance at retirement were at or below $1,009,533 (-35.0% less than your projected balance at retirement), your plan would call for a $6,838 decrease in retirement income to $129,921.

Income Analysis



Source	Amount	%
Social Security	$0	0%
Other Income	$25,352	12.5%
Portfolio Withdrawals	$177,219	87.5%
Gross Income	*$202,571*	

Based on your inputs and chosen plan parameters, the chart above shows how much of this plan's first (or current) year of income comes from portfolio withdrawals, Social Security, and other sources.

IMPORTANT: The projections or other information generated by Income Lab regarding the likelihood of various investment outcomes are hypothetical in nature, do not reflect actual investment results and are not guarantees of future results.

Long Term Income Outlook

In order to estimate the possible outcomes of a dynamic plan - one that adjusts and adapts to changing circumstances - we have simulated the experiences of hypothetical households that increased and decreased income according to the plan reported on here. The information below summarizes the results of these plan tests.

Lifetime Income Experience

This section reports on total simulated overall income, including income adjustments, compared to the income plan without adjustments.

89% Scenarios Above Plan

↑ Average:	**29% above planned**
↑ Best case:	**83% above planned**

89% of simulated scenarios had more total income over time than planned. On average, total lifetime income was 29% higher than planned. In the best case, total lifetime income was 83% higher than planned.

11% Scenarios Below Plan

↓ Average:	**3% below planned**
↓ Worst case:	**9% below planned**

11% of simulated scenarios had less total income over time than planned. On average, total lifetime income was 3% lower than planned. In the worst case, total lifetime income was 9% lower than planned.

Income Adjustments

Dynamic plans involve adjustments to income due to inflation and changes in other financial and economic circumstances. The results below report on the size and frequency of these adjustments in the plan tests.

Average Increase

5.4% every 1.7 years

Largest increase:	**43.5%**
90% of increases:	**5% - 9.8%**

On average, simulated scenarios had a 5.4% increase in income every 1.7 years. The largest single increase in any simulated scenario was 43.5%, but 90% of increases were between 5% and 9.8%.

Average Decrease*

-5.7% every 58.6 years

Largest decrease:	**14.8%**
90% of decreases:	**0.6% - 8.6%**

On average, simulated scenarios had a 5.7% decrease in income every 58.6 years. The largest single decrease in any simulated scenario was 14.8% but 90% of decreases were between 0.6% and 8.6%.*

* Note that reductions in income from an above-plan level to another above-plan level are not included in these statistics since they do not result in income below plan.

Tax Brackets

Many parts of the income tax system have multiple tax brackets that apply to different levels of income. A tax bracket is the amount of each type of tax that would be paid on an additional dollar of income, if that dollar is subject to the relevant tax. The table below shows estimated tax brackets based on your inputs and chosen tax, investment return, and inflation assumptions.

Year	SSI Taxability Bracket	IRMAA Bracket	Ordinary Tax Bracket	LTCG Tax Bracket	State Tax Bracket	MAGI	Gross Total Income	Effective Total Tax Rate
2026	85%	2	24%	18.8%	3.07%	$282,442	$282,442	19.45%
2027	85%	2	24%	18.8%	3.07%	$283,408	$283,408	19.48%
2028	85%	2	24%	18.8%	3.07%	$283,700	$283,700	19.49%
2029	85%	2	24%	18.8%	3.07%	$284,011	$284,011	19.5%
2030	85%	2	24%	18.8%	3.07%	$284,342	$284,342	19.51%
2031	85%	2	24%	18.8%	3.07%	$284,694	$284,694	19.52%
2032	85%	2	24%	18.8%	3.07%	$285,069	$285,069	19.53%
2033	85%	0	22%	15%	3.07%	$191,868	$208,374	13.15%
2034	85%	0	22%	15%	3.07%	$181,669	$197,291	12.77%
2035	85%	0	22%	15%	3.07%	$168,733	$185,975	10.36%
2036	85%	0	22%	15%	3.07%	$166,384	$183,720	10.21%
2037	85%	0	22%	15%	3.07%	$163,873	$181,271	10.06%
2038	85%	0	22%	15%	3.07%	$160,398	$178,735	9.81%
2039	85%	0	22%	15%	3.07%	$157,939	$176,052	9.66%
2040	85%	0	22%	15%	3.07%	$141,862	$158,270	8.54%
2041	85%	0	12%	15%	3.07%	$135,190	$150,887	8%
2042	85%	0	12%	0%	3.07%	$132,992	$148,454	7.89%

SSI Taxability Bracket: Maximum amount of Social Security income that could be subject to taxation

Ordinary Tax Bracket: Tax bracket for Federal ordinary income tax

State Tax Bracket: Tax bracket for state personal income tax

Effective Total Tax Rate: Total taxes paid as a percentage of total income

IRMAA Bracket: Bracket number for Medicare Income-Related Monthly Additional Amount

LTCG Tax Bracket: Tax bracket for Federal long-term capital gains tax

MAGI: Federal modified adjusted gross income

Year	SSI Taxability Bracket	IRMAA Bracket	Ordinary Tax Bracket	LTCG Tax Bracket	State Tax Bracket	MAGI	Gross Total Income	Effective Total Tax Rate

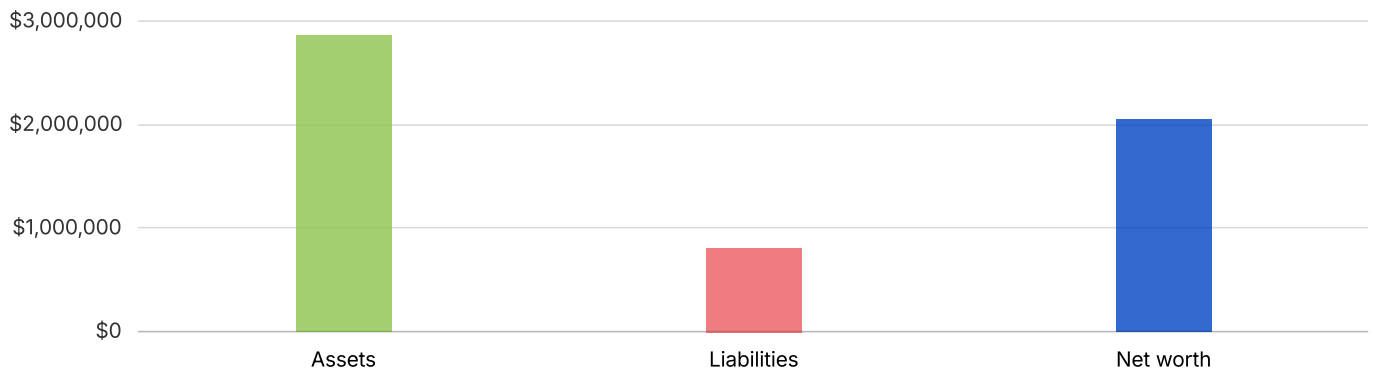
Balance Sheet

Net worth is the difference between assets and liabilities. Assets are things you own, such as a home, a business, or investment accounts. Liabilities are things you owe, such as the balance on a mortgage and other debt. The information below reflects your inputs.

Total Assets	Total Liabilities	Net Worth
$2,868,840	$811,959	$2,056,881



Investment Accounts	**$825,817**
Stocks - Mr and Mrs	$127,382
Company 401k - Mr	$666,589
529 - Mr	$31,845
Roth IRA - Mrs	$1

Banking Accounts	**$51,866**
Bank accounts - Mr and Mrs	$51,866

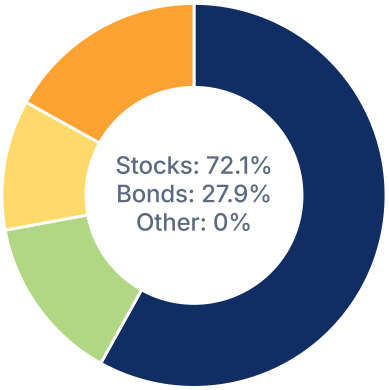
Other Assets	**$1,991,157**
Primary home - Mr and Mrs	$662,022
Investment Property #1 - Mr	$356,473
Investment Property #2 - Mr	$183,329

Other Assets	$1,991,157
Investment Property #3 - Mr	$280,086
Investment Property #4 - Mr and Mrs	$509,247

Liabilities	$811,959
Mortgage - Primary - Mr	$297,208
Mortgage #1 - Mr and Mrs	$208,250
Mortgage #3 - Mrs	$169,853
Mortgage #4 - Mr and Mrs	$136,648

Asset Allocation

The following specifies the target asset allocation of the plan reported on here, based on your inputs. This is not a report of your current investment allocation or a substitute for the information contained in the official account statements provided by custodian(s). The assumed average portfolio return and standard deviation shown below are net of inflation.

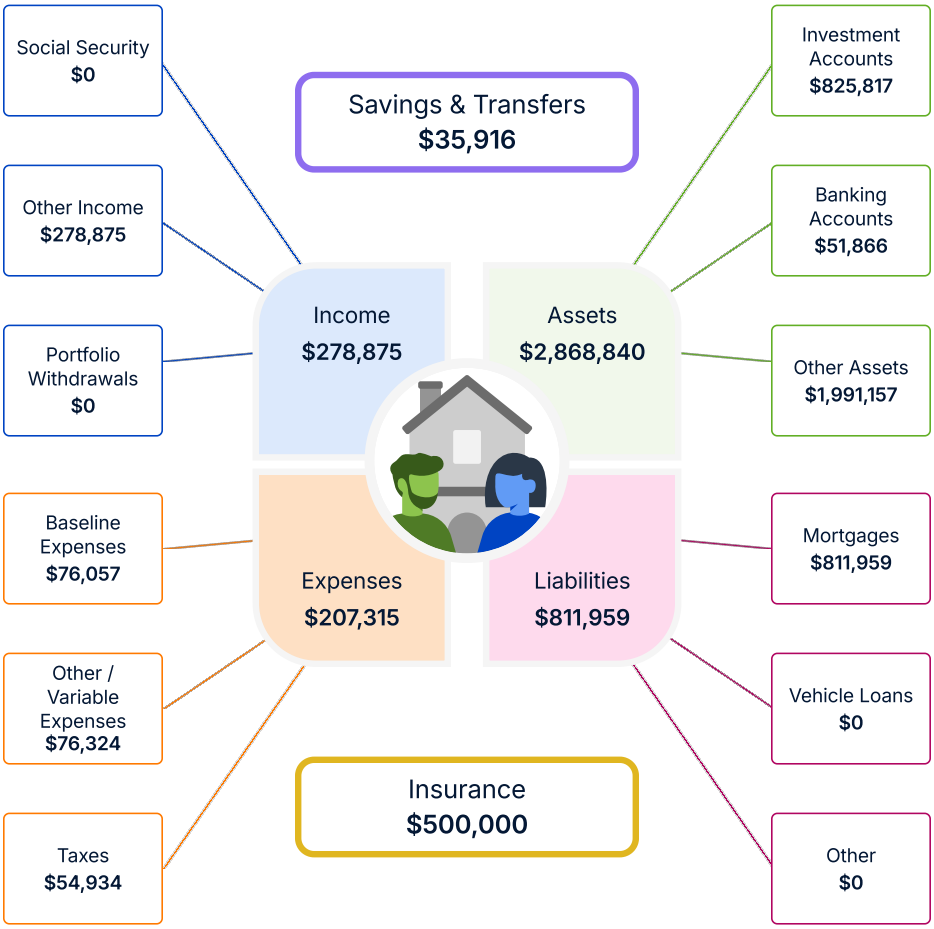


Annual Return: --%
Standard deviation: --%

Asset Class	Balance	%
US All Cap	$484,475	58.1%
International	$117,093	14%
Long-Term US Govt	$91,482	11%
Intermediate-Term US Govt	$141,249	16.9%

The Sample Household - Household P... (2026)

Mr Sample (58) Mrs Sample (56)



This report reflects plan inputs and estimates based on chosen plan assumptions, such as portfolio growth and inflation rates. Actual values may differ from the values displayed here. Income, Expenses, and Savings & Transfers are calendar year totals. Beginning-of-year values are shown for Assets, Liabilities, and Insurance. All values are displayed in today's dollars. See Assumptions for more information.

Important Disclaimer

Income Laboratory, Inc. (“Income Lab”) does not provide investment, financial, tax or legal advice. The information provided in the Income Lab application and outputs from this application may not be relied on for purposes of avoiding any federal tax penalties. You are encouraged to seek financial, tax and legal advice from your professional advisors.

Assumptions and historical data regarding rates of return, risk, inflation, longevity and other factors may be used in your plan analysis. These data should not be considered a guarantee of future performance or a guarantee of achieving overall financial objectives. Past performance is not a guarantee of future results of either investment indices or of any particular investment.

Information generated and displayed in the Income Lab application and outputs from this application regarding the likelihood of various investment and retirement income outcomes are estimates and are hypothetical in nature. They do not reflect actual investment results and are not guarantees of future results. Returns data and assumptions regarding investment returns behavior are not reflective of any specific product, and do not include specific fees or expenses that may be incurred by investing in specific products. The actual returns of a specific product may be different from the returns modeled in Income Lab.

Plan results may vary with each use and over time. Furthermore, plan results may vary depending on the selected analysis method and other plan parameters and settings.

Information Provided by Client

Information that you provided about your assets, financial goals, and personal situation are key assumptions for plan calculations and analysis. Please review your plan and Income Policy Statement to verify the accuracy of this information. If any of the assumptions are incorrect, you should notify your financial professional. Even small changes in assumptions can have a substantial impact on results. The information you provide should be reviewed periodically and updated when either the information or your circumstances change.

All asset and net worth information included in the Income Lab application and outputs from this application was provided by you or your designated agent(s) and is not a substitute for the information contained in the official account statements provided to you by custodian(s). The current asset data and values contained in those official account statements should be used to update the information included in Income Lab and your Income Policy Statement, as necessary.

Assets in account(s) may not be covered by FDIC or SIPC. FDIC and SIPC coverages apply only to certain assets and may be subject to limitations. Questions about coverage that may apply should be directed to the asset provider or sponsor. Information that you provided about your assets, financial goals, and personal situation are key assumptions for plan calculations and analysis.

Please review your plan and Income Policy Statement to verify the accuracy of this information. If any of the assumptions are incorrect, you should notify your financial professional. Even small changes in assumptions can have a substantial impact on results. The information you provide should be reviewed periodically and updated when either the information or your circumstances change.

Assumptions and Limitations

Calculations for your plan use asset class returns data, not returns of actual investments. The projected return assumptions used may be estimates based on average annual or monthly returns for each asset class. Portfolio returns are calculated by weighting individual asset class return assumptions according to portfolio allocation specified in your plan as well as any specified asset-class specific fees. Portfolio returns reflect weighted net asset class returns reduced further for any other overall fees entered in your plan.

All results in the Income Lab application and outputs from this application are estimates and are hypothetical in nature. If your plan uses historical data in its analysis, this data is derived from historical asset-class index returns data since 1871. For certain specific asset classes, returns data is not available for this full historical time. In these cases, returns data for a more general asset class may be used for earlier time periods.

Monte Carlo simulations, which are hypothetical in nature, model a wide range of possible outcomes based on capital market assumptions entered and maintained by your financial professional or their firm. These assumptions do not reflect actual investment results and are not guarantees of future results.

All results use simplifying assumptions that may not completely or accurately reflect your specific circumstances. No plan can predict the future. As investment returns, inflation, taxes, and other economic conditions vary from the plan assumptions, your actual results may vary from those presented the Income Lab application and outputs from this application.

No portfolio allocation eliminates risk or guarantees investment results. Income Lab does not provide recommendations on investment allocations or for any products or securities.

I/We have received and read this Disclaimer and understand its contents and, therefore, the limitations of the Income Lab application and outputs from the application. Furthermore, I understand that none of the calculations and presentations of investment returns are guaranteed.
